Pandaemonium 1660-1886 Humphrey Jennings 2012-10-04 Collecting texts taken from letters, diaries, literature, scientific journals and reports, Pandæmonium gathers a beguiling narrative as it traces the development of the machine age in Britain. Covering the years between 1660 and 1886, it offers a rich tapestry of human experience, from eyewitness reports of the Luddite Riots and the Peterloo Massacre to more intimate accounts of child labour, Utopian communities, the desecration of the natural world, ground-breaking scientific experiments, and the coming of the railways. Humphrey Jennings, co-founder of the Mass Observation movement of the 1930s and acclaimed documentary film-maker, assembled an enthralling narrative of this key period in Britain's national consciousness. The result is a highly original artistic achievement in its own right. Thanks to the efforts of his daughter,

Marie-Louise Jennings, *Pandæmonium* was originally published in 1985, and in 2012 it was the inspiration behind Danny Boyle's electrifying Opening Ceremony for the London Olympic Games. Frank Cottrell Boyce, who wrote the scenario for the ceremony, contributes a revealing new foreword for this edition.

The Division of Labor in Society Emile Durkheim 2013-01-01 Emile Durkheim is often referred to as the father of sociology. Along with Karl Marx and Max Weber he was a principal architect of modern social science and whose contribution helped establish it as an academic discipline. "The Division of Labor in Society," published in 1893, was his first major contribution to the field and arguably one of his most important. In this work Durkheim discusses the construction of social order in modern societies, which he argues arises out of two essential forms of solidarity, mechanical and organic. Durkheim further examines how this social order has changed over time from more primitive societies to advanced industrial ones. Unlike Marx, Durkheim does not argue that class conflict is inherent to the modern Capitalistic society. The division of labor is an essential component to the practice of the modern capitalistic system due to the increased economic efficiency that can arise out of specialization; however Durkheim acknowledges that increased specialization does not serve all interests equally well. This important and foundational work is a must read for all students of sociology and economic philosophy.
