Medieval Callings Jacques Le Goff 1995-12-18 These essays by eleven internationally renowned historians present nuanced profiles of the major social and professional groups—the callings-of the Middle Ages. The contributors focus on attitudes of medieval men and women toward their own society. Through a variety of techniques, from a reading of the Song of Roland to a reading of administrative records, they identify characteristic viewpoints of members of the fighting class, the clergy, and the peasantry. Along with vivid descriptions of what life was like for warrior knights, monks, high churchmen, criminals, lepers, shepherds, and prostitutes, this innovative approach offers a valuable new perspective on the complex social dynamics of feudal Europe. "Very useful discussions of texts, both learned and literary."—Christopher Dyer, *Times Literary Supplement* Contributors: Mariateresa Fumagalli Beonio Brocchieri, Franco Cardini, Enrico Castelnuovo, Giovanni Cherubini, Bronislaw Geremek, Aron Ja. Gurevich, Christiane Klapisch-Zuber, Jacques Le Goff, Giovanni Miccoli, Jacques Rossiand, and André Vauchez.

Polish Scientific Philosophy Francesco Coniglione 1993 One can often encounter an opinion that Polish scientific (or analytic) philosophy (or the Lvov-Warsaw School) deserves to be much better known than actually is. This book is thought as a response to such a claim. The papers collected in this volume are divided into two parts: Background and Influence and History and Systematics. However, there is no sharp borderline between themes which are touched in both parts. Generally speaking, all papers of the first part relate the Lvov-Warsaw School to some philosophical movements (Brentanism, phenomenology and Marxism) external to it whereas the papers collected in the second one focus on internal issues connected with the school (only Roberto Poli takes into account Brentano's views in his discussion of reism). Since the Polish school of mathematical logic is much better known than the Polish analytic philosophy we decided to omit here any treatment of the former. Thus, this collection centers on purely philosophical matters. We projected this volume not as an exhaustive panorama of Polish analytic philosophy but rather as a series of essays on particular persons or topic. As a result one can find here papers on Twardowski, Ajdukiewicz, Kotarbinski, Tarski and Lukaszewicz as well as on ethics on science, nominalism, and the methodology of psychology. We hope that this book will contribute to a better knowledge and evaluation of Polish achievements in analytic philosophy. We would like to express our gratitude to Professor Leszek Nowak, the editor-in-chief of *Poznan Studies in the Philosophy of the Sciences and the Humanities*, who initiated the idea of the collection and helped in its preparation.

Gender from Latin to Romance Michele Loporcaro 2017-12-01 This book explores grammatical gender in the Romance languages and dialects and its evolution from Latin. Michele Loporcaro investigates the significant diversity found in the Romance varieties in this regard; he draws on data from the Middle Ages to the present from all the Romance languages and dialects, discussing examples from Romanian to Portuguese and crucially also focusing on less widely-studied varieties such as Sursilvan, Neapolitan, and Asturian. The investigation first reveals that several varieties display more complex systems than the binary masculine/feminine contrast familiar from modern French or Italian. Moreover, it emerges that traditional accounts, whereby neuter gender was lost in the spoken Latin of the late Empire, cannot be correct: instead, the neuter gender underwent a range of different transformations from Late Latin onwards, which are responsible for the different systems that can be observed today across the Romance languages. The volume provides a detailed description of many of these systems, which in turns reveals a wealth of fascinating data, such as varieties where 'husbands' are feminine and others where 'wives' are masculine; dialects in which nouns overtly mark gender, but only in certain syntactic contexts; and one Romance variety (Asturian) in which it appears that grammatical gender has split into two concurrent systems. The volume will appeal to linguists from a range of backgrounds, including Romance linguistics, historical linguistics, typology, and morphosyntax, and is also of relevance to those working in sociology, gender studies, and psychology.

The paragraphs are not long, so there is no need to do a lot of back and forth to see the German translation and the English text. The text is relatively simple vocabulary and grammar wise, but not very simple at all, so for beginners this should be a great challenge.

HOW TO LEARN SPANISH IN 30 DAYS Giovanni Sordelli 2021-10-19 This book will allow you to learn Spanish in only 30 days, starting from scratch. And this is more than a simple promise. Let me explain... The method is very simple: this book is divided in 30 chapters, one for each day, to let you learn the basics of this language in just one month. To make the most of this course, you just need to follow one rule: reading one chapter every day, no more, no less. If you follow this rule and the guidelines included in this book, the result is guaranteed. Forget about the usual boring grammar courses, with their impersonal style. "How to learn Spanish in 30 days" has been created with all the trappings of self-help, as a practical manual, with a personal, fun and motivational touch. It is full of many curious anecdotes and useful pieces of advice not only to speak in Spanish, but also to help you while travelling. If you are still not convinced, keep reading... FROM THE PREFACE... (..) You are going to tell me: "so, in 30 days I will be able to learn an entire language?". The answer is YES! First of all, as any valuable product, it has brilliantly passed the quality check: friends and relatives have tested this manual and the following month they did pretty well with grammar and vocabulary, trust me. Of course, in 30 days no one becomes a native speaker: but you can build a strong foundation on which to build a beautiful house. Do you get what I mean? Studying a little bit every day is a secret as simple as it is effective to make the learning easier and quicker. I will give you the opportunity to analyse in depth every little secret about grammar and vocabulary, and you must really promise me that you will do everything you can to complete this rich training: consult online newspapers, watch films or TV series with subtitles, read a good book with a dictionary next to you, in short take every little opportunity to be in contact with Spanish as much as possible. Then there will be space for real dialogues in Spanish, the testing ground for your theoretical skills. When you go on holiday to a Spanish-speaking country or you will have to use Spanish in any other situation, you will just want to do your best. Think about this: one month. 30 days of studying will help you learning a new language, improving your curriculum, immersing yourself in a new and different world. It will be a special month, and you will be satisfied.

The Making of the Middle Sea Cyprian Broodbank 2015-08-31 The Mediterranean has been for millennia one of the global cockpits of human endeavour. World-class interpretations exist of its Classical and subsequent history, but there has been remarkably little holistic exploration of how its societies, culture and economies first came into being, despite the fact that almost all the fundamental developments originated well before 500 bc. This book is the first full, interpretive synthesis for a generation on the rise of the Mediterranean world from its beginning, before the emergence of our own species, up to the threshold of Classical times. Extensively illustrated and ranging across disciplines, subject matter and chronology from early humans and the origins of farming and metallurgy to the rise of civilizations - Egyptian, Levantine, Hispanic, Minoan, Mycenaean, Phoenician, Etruscan, early Greek - the book is a masterpiece of archaeological and historical writing.

Writing Down the Bones Natalie Goldberg 2016-02-02 For more than thirty years Natalie Goldberg has been challenging and cheering on writers with her books and workshops. In her groundbreaking first book, she brings together Zen meditation and writing in a new way. Writing practice, as she calls it, is no different from other forms of Zen practice—"it is backed by two thousand years of studying the mind." This thirtieth-anniversary edition includes new forewords by Julia Cameron and Bill Addison. It also includes a new preface in which Goldberg reflects on the enduring quality of the teachings here. She writes, "What have I learned about writing over these thirty years? I've written fourteen books, and it's the practice here in *Bones* that is the foundation, sustaining and building my writing voice, that keeps me honest, teaches me how to endure the hard times and how to drop below discursive thinking, to taste the real meat of our minds and the life around us."

The Cultural Nature of Human Development Barbara Rogoff 2003-02-13 "Barbara Rogoff argues that human development must be understood as a cultural process. Individuals develop as participants in their cultural communities, engaging with others in shared endeavors and building on cultural practices of prior generations ... [This book] identifies patterns in the differences and similarities among cultural communities, such as children's opportunities to engage in mature activities of their community or in specialized child-focused activities. The book examines classic aspects of development afresh from a cultural angle--childrearing, social relations, interdependence and autonomy, developmental transitions across the lifespan, gender roles, attachment, and learning and cognitive development"--Dust jacket.

The issues discussed by the conference are twofold. Firstly, that of trauma representation, an issue escaping by definition from any imaginable specific field. Secondly, that of a wide range of topics concerning the concept of "visual narrative," an issue which can only be studied by comparing as many media and practices as possible. The essays of this volume are grouped here in two major parts, their focus depending on either a more general topic or on a very specific graphic author. The first part of the book, "Violence and trauma in the Graphic Novel", opens with a certain number of reflections on the representation of violence in literary and visual graphic novels, and continues with a whole set of close readings of graphic novels by Art Spiegelman (Maus I and II) and Jacques Tardi (whose masterwork "C'tait la guerre des tranches" is still waiting for its complete English translation). The second part of the book presents in the first place a survey of the current graphic novel production, and insists sharply on the great diversity of the range in the various 'continental' traditions (for instance underground 'comix', and feminist comics, high-art graphic novels, critical superheroes-fiction) whose separation is nowadays increasingly difficult to maintain. It continues and ends with a set of theoretical interventions where not only the reciprocal influences of national and international traditions, but also those between genres and media are strongly forwarded, the emphasis being here mainly on problems concerning ways of looking and positions of spectatorship.

Morphology by Itself Mark Aronoff 1993-12-02 Most recent research in generative morphology has avoided the treatment of purely morphological phenomena and has focused instead on interface questions, such as the relation between morphology and syntax or between morphology and phonology. In this monograph Mark Aronoff argues that linguists must consider morphology by itself, not merely as an appendage of syntax and phonology, and that linguistic theory must allow for a separate and autonomous morphological component. Following a general introductory chapter, Aronoff examines two narrow classes of morphological phenomena to make his case: stems and inflectional classes. Concentrating first on Latin verb morphology, he argues that morphological stems are neither syntactic nor phonological units. Next, using data from a number of languages, he underscores the traditional point that the inflectional class of a word is not reducible to its syntactic gender. He then explores in detail the phonologically motivated nominal inflectional class system of two languages of Papua New Guinea (Arapeshand Yimas) and the precise nature of the relation between this system and the corresponding gender system. Finally, drawing on a number of Semitic languages, Aronoff argues that the verb classes of these languages are purely inflectional although they are partly motivated by derivational and syntactic considerations.

Renaissance Characters Eugenio Garin 1997-05-09 Compared to the Middle Ages, the Renaissance is brief—little more than two centuries, extending roughly from the mid-fourteenth century to the end of the sixteenth century—and largely confined to a few Italian city states. Nevertheless, the epoch marked a great cultural shift in sensibilities, the dawn of a new age in which classical Greek and Roman values were "reborn" and human values in all fields, from the arts to civic life, were reaffirmed. With this volume, Eugenio Garin, a leading Renaissance scholar, has gathered the work of an international team of scholars into an accessible account of the people who animated this decisive moment in the genesis of the modern mind. We are offered a broad spectrum of figures, major and minor, as they lived their lives: the prince and the military commander, the cardinal and the courtier, the artist and the philosopher, the merchant and the banker, the voyager, and women of all classes. With its concentration on the concrete, the specific, even the anecdotal, the volume offers a wealth of new perspectives and ideas for study.

Handbook of International Futurism Günter Berghaus 2018-12-17 The Handbook of International Futurism is the first reference work ever to presents in a comparative fashion all media and countries in which the movement, initiated by F.T. Marinetti in 1909, exercised a particularly noteworthy influence. The handbook offers a synthesis of the state of scholarship regarding the international radiation of Futurism and its influence in some fifteen artistic disciplines and thirty-eight countries. While acknowledging the great achievements of the movement in the visual and literary arts of Italy and Russia, it treats Futurism as an international, multidisciplinary phenomenon that left a lasting mark on the manifold artistic manifestations of the early twentieth-century avant-garde. Hundreds of artists, who in some phase in their career absorbed Futurist ideas and stylistic devices, are presented in the context of their national traditions, their international connections and the media in which they were predominantly active. The handbook acts as a kind of multi-disciplinary, geographical encyclopaedia of Futurism and gives scholars with varying levels of experience a detailed overview of all countries and disciplines in which the movement had a major impact.
