Inequality Studies from the Global South David Francis 2020-05-25 This book offers an innovative, interdisciplinary approach to thinking about inequality, and to understanding how inequality is produced and reproduced in the global South. Without the safety net of the various Northern welfare states, inequality in the global South is not merely a socio-economic problem, but an existential threat to the social contract that underpins the democratic state and society itself. Only a response that is firmly grounded in the context of the global South can hope to address this problem. This collection brings together scholars from across the globe, with a particular focus on the global South, to address broad thematic areas such as the conceptual and methodological challenges of measuring inequality; the political economy of inequality in the global South; inequality in work, households and the labour market; and inequalities in land, spaces and cities. The book concludes by suggesting alternatives for addressing inequality in the global South and around the world. The pioneering ideas and theories put forward by this volume make it essential reading for students and researchers of global inequality across the fields of sociology, economics, law, politics, global studies and development studies.

Critical Issues in Human Rights and Development Marks, Stephen P. 2021-11-09 This collection addresses human rights and development for researchers, policymakers and activists at a time of major challenges. Critical issues in the title signifies both the urgency of the issues and the need for critical rethinking. After exploring the overarching issues of development and economic theory, gender, climate change and disability, the book focuses on issues of technology and trade, education and information, water and sanitation, and work, health, housing and food.

Finding Time Heather Boushey 2016-04-19 Employers demand more of employees' time while leaving the important things in life—health, family—for workers to take care of on their own time and dime. How can workers get ahead while making sure their families don't fall behind? Heather Boushey shows in detail that economic efficiency and equity do not have to be enemies.

Mega-Regional Trade Agreements Thilo Rensmann 2017-07-20 This book provides an in-depth analysis of "Mega-Regionals", the new generation of trans-regional free-trade agreements (FTAs) currently under negotiation, and their effect on the future of international economic law. The main focus centres on the EU-US Transatlantic Trade and Investment Partnership (TTIP), the Trans-Pacific Partnership (TPP) and the EU-Canada Comprehensive Economic and Trade Agreement (CETA), but the findings are also applicable to similar agreements under negotiation, such as the Regional Comprehensive Economic Partnership (RCEP). The specific features of Mega-Regional Trade Agreements raise a number of issues with respect to their potential effect on the current system of international trade and investment law. These include the consequences of Mega-Regionals for the most-favoured-nation (MFN) principle, their relation to the multilateral system of the World Trade Organization (WTO), their democratic legitimacy and their interaction with existing bilateral investment treaties (BITs). The book is intended for academics and practitioners working in the field of international economic law.

The Economics of Monetary Unions Juan E. Castañeda 2020-03-16 In this book, a historical analysis of the precedents of the euro is examined within the context of the current issues affecting the Eurozone and the long-term effects of the institutional changes implemented since 2010. The book begins by placing the Eurozone challenges in the historical context of previous monetary unions, drawing on the experience of the gold standard. It then specifically focuses on the problems arising from the running of permanent trade imbalances within the Eurozone. The authors explore the advantages and disadvantages of being a member of the Eurozone and attempt to measure the optimality of a currency area by the calculation of an index on internal macroeconomic asymmetries. They address the proposals recently made in favour of a fiscal union in the Euro zone; including the economic and political feasibility of fiscal transfers in the Eurozone. The final two papers discuss whether the monetary union is in fact more than just that, and whether it will lead inevitably to some form of political union if it is to survive. With chapters by leading experts from both Europe and the UK, this book will appeal to students in Economics, Finance, Politics, EU integration and European studies; as well as academics and professional economists doing research in EU integration, the Euro zone, monetary history and monetary and banking unions in Europe, the UK and elsewhere.

Capacity Mechanisms in EU Energy Markets Leigh Hancher 2015-09-24 Ensuring an adequate, long-term energy supply is a paramount concern in Europe. EU member states now intervene by encouraging investment in generation capacity, offering an additional revenue stream for conventional power plants in addition to the existing, heavily subsidised investments in renewable energy sources. These capacity remuneration mechanisms (or simply capacity mechanisms) have become a hot topic in the wider European regulatory debate. European electricity markets are increasingly interconnected, so the introduction of a capacity mechanism in one country not only distorts its national market but may have unforeseeable consequences for neighbouring electricity markets. If these mechanisms are adopted by several member states with no supra-national coordination and no consideration for their cross-border impact, they may cause serious market distortions and put the future of the European internal electricity market at risk. This book provides readers with an in-depth analysis of capacity mechanisms, written by an expert team of policy-makers, economists, and legal professionals. It will be a first point of reference for regulators and policy-makers responsible for designing optimal capacity mechanisms in Europe, and will be an invaluable resource for academics and practitioners in the fields of energy, regulation, and competition.

An Alternative Approach to Liquidity Risk Management of Islamic Banks Muhammed Habib Dolgun 2021-01-18 Despite noticeable growth in Islamic banking and finance literature in recent years, very few published books in this area deal with supervisory and regulatory issues in Islamic banking – theoretically or empirically – and none with the critical issue of risks involved in liquidity management of Islamic banks. This unique book is the first of its kind in dealing with challenges these financial institutions face in the absence of interest rate mechanism and debt-based financial instruments. The book examines critically issues involve in managing the risk of liquidity management for these types of institutions, including those stemming from Basel requirements. It then offers an alternative regulatory framework more appropriately suited for such banks without compromising safety and security. The book's unique features and innovative

dimensions diagnostically differentiate between Islamic banks and conventional banks as related to liquidity management risks. It proposes a risk-sharing regulatory framework that, once implemented, would mitigate risks posed by balance-sheet mismatches. The book aims to assist regulators, supervisors, Islamic finance practitioners, academicians and other relevant stakeholders.

Istanbul Programme of Action for the LDCs (2011-2020) LDC IV Monitor 2014-10-17 Ambitious in nature, the Istanbul Programme of Action (IPOA) for the Least Developed Countries (LDCs) adopted by the Fourth United Nations Conference on the LDCs (UN LDC IV) in 2011, sets out a development path for LDCs for the coming decade. Successful implementation of the IPOA requires identification of delivery tools for specific targets, provision of necessary financial and non-financial resources, and a strengthened monitoring mechanism. LDC IV Monitor, an independent partnership of eight interested organisations, aims to add value by enhancing transparency, accountability and efficiency of the official monitoring and review mechanism of the IPOA. LDC IV Monitor's first set of two reports, produced outside of the official intergovernmental process, provide credible, evidence-based and policy-oriented assessment of the delivery status of the promises contained in the IPOA. The Synthesis Report, derived from the critical analyses of the state of play concerning the IPOA, presents the broad messages and key recommendations. The volume on Analytical Perspectives addresses a wide spectrum of issues including articulation of a composite IPOA index, building of productive capacity, trade in goods and services, delivery of the Millennium Development Goals (MDGs), flows of different forms of development finance, and consequences of climate change. The publications seek to contribute towards crafting national and international policies to support graduation of the LDCs through structural transformation of their economies.

Handbook on the Economics of Foreign Aid Byron Lew 2015-10-30 It would be fair to say that foreign aid today is one of the most important factors in international relations and in the national economy of many countries – as well as one of the most researched fields in economics. Although much has been written on the subject of foreign aid, this book contributes by taking stock of knowledge in the field, with chapters summarizing long-standing debates as well as the latest advances. Several contributions provide new analytical insights or empirical evidence on different aspects of aid, including how aid may be linked to trade and the motives for aid giving. As a whole, the book demonstrates how researchers have dealt with increasingly complex issues over time – both theoretical and empirical – on the allocation, impact, and efficacy of aid, with aid policies placed at the center of the discussion. In addition to students, academics, researchers, and policymakers involved in development economics and foreign aid, this Handbook will appeal to all those interested in development issues and international policies.

Employment Relations in the Shadow of Recession Brigid van Wanrooy 2013-11-25 How have employment relations evolved over the last decade? And how did workplaces and employees fare in the face of the longest recession in living memory?

Employment Relations in the Shadow of Recession examines the state of British employment relations in 2011, how this has changed since 2004, and the role the recession played in shaping employees' experiences of work. It draws on findings from the 2011 Workplace Employment Relations Study, comparing these with the results of the previous study conducted in 2004. These surveys – each collecting responses from around 2,500 workplace managers, 1,000 employee representatives and over 20,000 employees – provide the most comprehensive portrait available of workplace employment relations in Britain. The book provides an in-depth analysis of the changes made to employment practices through the recession and of the impact that the economic downturn had on the shape and character of the employment relationship.

An Investment Perspective on Global Value Chains Christine Zhenwei Qiang 2021-06-15 This report investigates the role of foreign direct investment (FDI) in helping developing countries participate in global value chains (GVCs). It combines the perspectives and strategies from three types of players: multinational corporations, domestic firms and governments. It aims to provide practical guidance for developing countries to develop strategies that use FDI to strengthen GVC participation and upgrading. The report has six main chapters: 1. FDI and GVCs. Assesses the trade-investment nexus and analyzes the effect of FDI in countries' GVC participation and upgrading at the country level. 2. MNCs shape GVC development. Highlights MNCs' contribution to global economy and how their business strategies shape the evolution of GVCs. The chapter also compares MNCs' business strategies in terms of outsourcing and offshoring, risk mitigation and increasing market power across GVC archetypes. 3. Domestic firm perspectives on GVC participation. Looks at the various paths domestic firms can take to internationalize their production and trade. Investigates domestic firm characteristics that predict higher GVC participation, and the effect of GVC participation on firm performance. 4. Investment policy and promotion: what is in a government's toolbox? Summarizes the various policy instruments governments have at their disposal to help attract MNCs to their country and facilitate GVC participation of domestic firms. 5. Integrating countries into GVCs. Draws on a range of case studies to illustrate how governments can develop coherent strategies and policy packages to integrate their countries into GVCs. 6. FDI and GVCs in the wake of COVID-19. Reflects the impact of COVID-19 on FDI and GVCs, the response from multinationals and suppliers, and the implications for GVC reconfiguration. In addition, there are seven case studies that offer more nuanced analysis on the GVC participation in selected countries and sectors: • Five qualitative case studies: Five countries have been selected that managed to use FDI to stimulate GVC participation using a range of approaches. By design, these five countries also cover five different GVC archetypes. These countries are: (1) Kenya (horticulture); (2) Dominican Republic (textiles); (3) Mauritius (tourism); (4) Malaysia (electronics); (5) China (software). • Two quantitative case studies: Rwanda, West-Bengal (India). These use a combination of firm- and transaction level datasets to study firm-level dynamics that explain the role of multinational and domestic firms across GVCs.

The Almighty Machine Pekka Vahvanen 2022-02-25 The hymn of Digitalization is nothing new: We must encourage the creation of new apps. We must develop AI in order to prevail among international competition. Technology's advance will halt climate change and let robots do the dumb stuff for us. Our faith in technology is powerful because it has saved us in the past. The Almighty Machine shows us technology's flip side. The things that once powered us toward a brighter tomorrow are already undermining our quality of life. The data stream has shattered our concentration, human relationships have been reduced to a menu of emojis, constant surveillance has nullified much of our privacy, and the development of AI could be the beginning of the end for us. We are becoming the casualties of our own success. Pekka Vahvanen's bristling and timely critique, deftly translated by Mark Jones, throws doubt on the necessity of technological development in a world saturated in tech. The Almighty Machine presents an important question: Does progress no longer make us happier?

A-CSEAR 2015-Proceedings of the 14th Australasian Centre on Social and Environmental Accounting Research Conference Dr

James Hazelton and Dr John Dumay 2015-11-13 The 14th Australasian Centre on Social and Environmental Accounting Research Conference (A-CSEAR 2015) is being held on 10-11 December 2015 at Macquarie University, Sydney, Australia. The Conference Chair is Dr John Dumay and the Programme Chair is Dr James Hazelton, both from Macquarie University. ACSEAR provides an opportunity for individuals researching and working in the field of social and environmental accounting in both public and private sectors, to come together to exchange ideas and discuss current research in the field. The theme for the conference this year is 'Partnerships', reflecting the belief amongst our community that achieving progress requires partnerships of all types - between academics of different disciplines, between industry and academia, between government and stakeholders, and of course between members and professional bodies. The keynote speakers for the conference are Charles de Villiers from Auckland University of Technology, New Zealand on the topic Theorising the interactions among legitimacy accountability and pro-activity in the social sphere; Helen Tregidga from Auckland University of Technology, New Zealand talking about Corporate chameleons greenwashing and counter narratives"; Markus J. Milne from the School of Business and Law at the University of Canterbury, New Zealand on the topic of Crass empiricism and the social construction of corporate environmental performance and Lee D. Parker from the School of Accounting, RMIT University, Melbourne, Australia who will address to issue of Accounting for CSR: Revisiting the agenda. ACSEAR received 60 abstract submissions. After the double-blind peer review process 21 academic research papers, have been accepted for publication in these conference proceedings. These papers represent research from around the world, including Australia, Brazil, China, Fiji, Iran, Italy, Japan, New Zealand, South Africa, UK and the USA.

Principles of Economics Volume 2 of 2 Textbook Equity Edition 2014-03-31 This is Volume 2 of 2, covering Chapters 24 - 34 and the appendices. See www.textbookequity.org/principles-of-economics Excerpt: Principles of Economics is designed for a two-semester principles of economics sequence. The text has been developed to meet the scope and sequence of most introductory courses. At the same time, the book includes a number of innovative features designed to enhance student learning. Instructors can also customize the book, adapting it to the approach that works best in their classroom. The pedagogical choices, chapter arrangements, and learning objective fulfillment were developed and vetted with feedback from educators dedicated to the project. They thoroughly read the material and offered critical and detailed commentary. The outcome is a balanced approach to micro and macro economics, to both Keynesian and classical views, and to the theory and application of economics concepts. Current events are treated in a politically-balanced way as well.

Blockchain Economics and Financial Market Innovation Umit Hacıoğlu 2019-12-03 This book discusses various aspects of blockchains in economic systems and investment strategies in crypto markets. It first addresses the topic from a conceptual and theoretical point of view, and then analyzes it from an assessment and investment angle. Further, it examines the opportunities and limitations of the taxation of crypto currency, as well as the political implications, such as regulation of speculation with crypto currencies. The book is intended for academicians and students in the fields of economics and finance.

Civil Liability and Financial Security for Offshore Oil and Gas Activities Michael Faure 2016-09-30 This book analyses how damage resulting from offshore-related incidents is compensated in European waters, whilst providing models to improve such compensation.

Banking's Final Exam Morris Goldstein 2017-05-30 Spurred by the success of the first stress test of US banks toward the end of the global economic crisis in 2009, stress testing of large financial institutions has become the cornerstone of banking supervision worldwide. The aim of the tests is to determine which banks are adequately capitalized under severe economic shocks and to order corrective measures for those that are vulnerable. In Banking's Final Exam, one of the world's leading experts on banking regulation concludes that the tests administered on both sides of the Atlantic suffer from fundamental weaknesses, leading to a false sense of reassurance about the safety and soundness of the banking system. Some weaknesses can be corrected within the existing bank-capital regime, but others will require bold reforms—including higher minimum capital requirements for the largest and most systemically-important banks. The banking industry is likely to resist these reforms, but this book explains why their objections do not hold water.

Emerging Dynamics of Sustainability in Multinational Enterprises John R. McIntyre 2016-02-26 Economic development that meets the needs of the global population without jeopardizing the capacity of future generations is a worldwide challenge for multinational enterprises (MNEs). They are expected to balance their role as global economic actors and environmental stewards in the environment in which they operate. Contributors from India, Europe and the United States offer new perspectives, contrasting US, European and emerging economies' approaches to sustainability, and how they can generate roadmaps which yield innovative solutions for one of the most contentious issues of our era. Their review suggests that the differential performance across developed and emerging economies has exposed potential weaknesses. Emerging Dynamics of Sustainability in Multinational Enterprises promotes greater emphasis on experimenting with unique local and sustainable approaches to solving problems faced by firms in, or from, emerging economies. This is a critical resource for researchers, practitioners and policy-makers concerned with sustainable development issues, and a fresh reference for graduate level students and academics focusing on corporate governance, sustainable development and ethics, as well as multinational enterprise management.

We Are Better Than This Edward D. Kleinbard 2014-09-17 "A book which examines how government - which is to say, all of us, acting collectively - can make our country healthier, wealthier and happier, if we put government to useful work in those areas where it most productively complements our private markets"---

The European Banking Union Giuseppe Boccuzzi 2016-01-26 The 2008 financial crisis all but brought down the financial system and real economies of industrial countries. The Banking Union took a broad approach to resolve the structural fragmentation and distortions in the European banking system which were major obstacles to a working single market for financial services. This book examines the numerous changes happening to European legislations for the prevention and management of banking crises. What emerges is a changing picture of regulations and institutions, of goals, tools and opinions, public and private, European and national all involved in the task. The book focuses on the new framework for banking crisis management, starting from the foundations of banking regulation and supervision. It explores the institutional architecture of banking supervision and crisis management, the powers of the authorities, the tools for administrative actions, the complexities of business and bankruptcy laws, individual rights and their legal guarantees.

Finance & Development, June 2013 International Monetary Fund. External Relations Dept. 2013-05-30 This paper highlights that one of the most dramatic developments in the 20th century was the entry of women into economic and political spheres previously occupied almost exclusively by men. Although women are making progress in eliminating gender disparities, they still lag men in the workplace and in the halls of government. These gaps are found throughout the world, but are particularly pronounced in developing economies. So far, the greatest success has been in reducing education and health disparities and the least in increasing women's economic and political influence.

Regional Development and Public Policy Challenges in India Rakhee Bhattacharya 2015-07-09 This book emphasizes the need for experimenting with more deliberate and rigorous policy processes to attain balanced regional development, which can promote both equity and efficiency in India's development discourse. The institutional mechanisms for dealing with regional imbalance in India have not been very successful so far. With rising discrepancies in development, demand for autonomy continues along with a new dimension of regionalism arising from submerged identity along with political and economic aspirations, which demanded new channels for solution. So far, attempts to create space for autonomy have possibly not optimally accommodated the conceptual mechanisms like equity and democratic process. Thus democratizing policy process using six pillars of voice: knowledge, objective, fundamental values, implementation framework and public awareness can ensure a better policy outcome for dealing with the persistent challenges of regional disparity in India. This book further focuses on the need for democratizing the policy process for regional development through discussion and inclusion. Such a transition needs innovation in policy regime, which can be attained through following six pillars (i) Democratic voice of stakeholders in policy development and implementation; (ii) Clear policy objectives that advance the common good, based on voice; (iii) Unbiased, sound and comprehensive knowledge and data bases. (iv) Consistency with constitutional values; (v) A sound implementation framework ensuring user-friendliness, transparency and rationality of decision-making processes, effective grievance redress, clear accountability and independent evaluation; (vi) Public awareness and support of policies with relevant and public participation in implementation.

The Political Economy of Electricity: Progressive Capitalism and the Struggle to Build a Sustainable Power Sector Mark Cooper 2017-04-24 Providing critical insights that will interest readers ranging from economists to environmentalists, policymakers, and politicians, this book analyzes the economics and technology trends involved in the dilemma of decarbonization and addresses why aggressive policy is required in a capitalist political economy to create a sea change away from fossil fuels. • Presents comprehensive and understandable reviews of more than 200 recent empirical studies of market imperfections in the energy efficiency and climate change literature, providing a basis for targeting policies at the most important causes of poor market performance • Argues that aggressive action to induce change and overcome resistance, using targeted policies rather than broad-based taxes, is the strategy that will create movement towards a decarbonized economy and world • Provides a logical decision-making framework and portfolio analysis that enables policymakers and regulators to choose, explain, and defend their decisions, objectively and transparently

Entrepreneurship in Small Island States and Territories Godfrey Baldacchino 2015-05-15 Entrepreneurship in Small Island States and Territories is the first publication to consider the 'creative' side of enterprise in small island states and territories. Rather than playing out as remote, vulnerable and dependent backwaters of neo-colonialism, the world's small island states and territories (with resident populations of less than 1 million) show considerable resourcefulness in facing up to the very real challenges of their predicament. The creative endeavours of their residents, facilitated by adroit public policy, has created economic and investment opportunities that translate into some private sector employment and decent livelihoods for many. Their ingenuity, coupled with strategic investments and the support of the diaspora, has led to a suite of (sometimes unlikely) products and services: from citizenship and higher-level internet domain names, to place-branded foods and beverages; from electronic gaming to niche manufacturing. There is much more to small island survival than subsistence farming, aid, remittances and public sector workfare. Entrepreneurship in Small Island States and Territories helps to dispel this myth, showcasing an aspect of life in small island states and territories that is rarely documented or critically reviewed.

System Level ESD Co-Design Charvaka Duvvury 2017-05-05 An effective and cost efficient protection of electronic system against ESD stress pulses specified by IEC 61000-4-2 is paramount for any system design. This pioneering book presents the collective knowledge of system designers and system testing experts and state-of-the-art techniques for achieving efficient system-level ESD protection, with minimum impact on the system performance. All categories of system failures ranging from 'hard' to 'soft' types are considered to review simulation and tool applications that can be used. The principal focus of System Level ESD Co-Design is defining and establishing the importance of co-design efforts from both IC supplier and system builder perspectives. ESD designers often face challenges in meeting customers' system-level ESD requirements and, therefore, a clear understanding of the techniques presented here will facilitate effective simulation approaches leading to better solutions without compromising system performance. With contributions from Robert Ashton, Jeffrey Dunnihoo, Micheal Hopkins, Pratik Maheshwari, David Pomerence, Wolfgang Reinprecht, and Matti Usumaki, readers benefit from hands-on experience and in-depth knowledge in topics ranging from ESD design and the physics of system ESD phenomena to tools and techniques to address soft failures and strategies to design ESD-robust systems that include mobile and automotive applications. The first dedicated resource to system-level ESD co-design, this is an essential reference for industry ESD designers, system builders, IC suppliers and customers and also Original Equipment Manufacturers (OEMs). Key features: Clarifies the concept of system level ESD protection. Introduces a co-design approach for ESD robust systems. Details soft and hard ESD fail mechanisms. Detailed protection strategies for both mobile and automotive applications. Explains simulation tools and methodology for system level ESD co-design and overviews available test methods and standards. Highlights economic benefits of system ESD co-design.

How Will Capitalism End? Wolfgang Streeck 2016-11-29 The provocative political thinker asks if it will be with a bang or a whimper After years of ill health, capitalism is now in a critical condition. Growth has given way to stagnation; inequality is leading to instability; and confidence in the money economy has all but evaporated. In How Will Capitalism End?, the acclaimed analyst of contemporary politics and economics Wolfgang Streeck argues that the world is about to change. The marriage between democracy and capitalism, ill-suited partners brought together in the shadow of World War Two, is coming to an end. The regulatory institutions that once restrained the financial sector's excesses have collapsed and, after the final victory of capitalism at the end of the Cold War, there is no political agency capable of

rolling back the liberalization of the markets. Ours has become a world defined by declining growth, oligarchic rule, a shrinking public sphere, institutional corruption and international anarchy, and no cure to these ills is at hand.

The Shadow Banking System Valerio Lemma 2016-04-08 The book shows the fundamentals of the shadow banking system and its entities, operations and risks. Focusing on the regulatory aspects, it provides an original view that is able to demonstrate that the lack of supervision is a market failure.

Rethinking the Future of Europe Stefan Schepers 2014-10-08 Rethinking the Future of Europe has brought together three contrasting collections of contributions: the incrementalist perspective concerning the step by step development of Europe, the more radical reform/restructuring approach to the future of Europe, and a view of Europe from the outside.

The Economics of Iraq Amer K. Hirmis 2018-03-12 Meticulously researched and written by Dr Amer K. Hirmis the book takes readers 6000 years back to early Mesopotamian polity, culture, and religious codes which shaped the economy, and

continue to shape much of the body of Iraq's polity, economy and society today. Economic inefficiency, inequality and lack of sufficient employment are common threads that run throughout Mesopotamian/Iraqi economic history. The persistence of poverty, high unemployment, conscious discrimination against women, and a polity dictating blind allegiance and obedience from the subjects to the ruler, denied the Iraqis achieving economic development, the ultimate aim of which is the sustained improvement of the well-being of the people. Even when economic growth was attained, it was desperately non-inclusive. With a novel approach to economic development, this book examines Iraq's economy over the past 100 years. It establishes the historical roots in the consumption patterns, nature of the producers, the economic structure, trade, monetary and fiscal policy and resource allocation. In all these areas the echoes from the ancient past are striking. The principles of Sumerian taxes are still applied in present-day Iraq. The book proposes a set of conditions, which will need to be created for Iraq to achieve economic development and functional democracy, in the distant future.

Core-periphery Relations in the European Union José M. Magone 2016-02-26 Successive Enlargements to the European Union membership have transformed it into an economically, politically and culturally heterogeneous body with distinct vulnerabilities in its multi-level governance. This book analyses core-periphery relations to highlight the growing cleavage, and potential conflict, between the core and peripheral member-states of the Union in the face of the devastating consequences of Eurozone crisis. Taking a comparative and theoretical approach and using a variety of case studies, it examines how the crisis has both exacerbated tensions in centre-periphery relations within and outside the Eurozone, and how the European Union's economic and political status is declining globally. This text will be of key interest to students and scholars of European Union studies, European integration, political economy, public policy, and comparative politics.
