Advances in Production Management Systems. Competitive Manufacturing for Innovative Products and Services Christos Emmanouilidis 2013-08-13

The two volumes IFIP AICT 397 and 398 constitute the thoroughly refereed post-conference proceedings of the International IFIP WG 5.7 Conference on Advances in Production Management Systems, APMS

2012, held in Rhodes, Greece, in September 2012. The 182 revised full papers were carefully reviewed and selected for inclusion in the two volumes. They are organized in 6 parts: sustainability; design, manufacturing and production management; human factors, learning and innovation; ICT and emerging technologies in production management; product and asset lifecycle management; and services, supply chains and operations.

Automated Technology for Verification and Analysis Ahmed Bouajjani

2010-09-03 These proceedings contain the papers presented at the 8th International Symposium on Automated Technology for Verification and Analysis held during September 21-24, 2010 in Singapore. The primary objective of the ATVA conferences remains the same: to exchange and promote the latest advances of state-of-the-art research on theoretical and practical aspects of automated analysis, verification and synthesis. From 72 papers submitted to ATVA 2010 in response to our call for papers, the Program Committee accepted 21 regular papers and 9 tool papers. Each paper received at least three reviews. The Program Committee worked hard to ensure that every submission received a rigorous and fair evaluation, with the final program selected after a 10-day online discussion via the EasyChairs system.

Our program also included three keynote talks and invited tutorials by Thomas

A. Henzinger (IST Austria), Joxan Järar (National University of Singapore) and Igor Walukiewicz (CNRS, France). The conference organizers were truly grateful to have such distinguished researchers as keynote speakers for the symposium. A new feature for the ATVA symposium this year were the two co-located workshops, In'nity 2010 (co-chaired by Yu-Fang Chen and Ahmed Rezhine) and PMCW 2010 (co-chaired by Jun Sun and Hai Wang). We are delighted with the expanded scope, interactions and depth that the two workshops helped bring to the symposium. Many people worked hard and offered their valuable time so generously to make ATVA 2010 successful. First and foremost, we would like to thank all authors who worked hard to complete and submit papers to the conference. The Program Committee members, reviewers and Steering Committee members also deserve special recognition. Without them, a competitive and peer-reviewed international symposium simply cannot take place.

Advanced Web Services Athman Bouguettaya 2013-08-13 Web services and Service-Oriented Computing (SOC) have become thriving areas of academic research, joint university/industry research projects, and novel IT products on the market. SOC is the computing paradigm that uses Web services as building blocks for the engineering of composite, distributed applications out of the reusable application logic encapsulated by Web services. Web services could be considered the best-known and most standardized technology in use today for distributed computing over the Internet. This book is the second installment of a two-book collection covering the state-of-the-art of both theoretical and practical aspects of Web services and SOC research and deployments. Advanced Web

Services specifically focuses on advanced topics of Web services and SOC and covers topics including Web services transactions, security and trust, Web service management, real-world case studies, and novel perspectives and future directions. The editors present foundational topics in the first book of the collection, *Web Services Foundations* (Springer, 2013). Together, both books comprise approximately 1400 pages and are the result of an enormous community effort that involved more than 100 authors, comprising the world's leading experts in this field.

Mission to Black America Ronald D Graybill 2019-02-02 Ron Graybill's

Mission to Black America remains as singular and significant an achievement as it was when first published nearly 50 years ago. It is a page-turner, accessible to readers across the spectrum of age groups and educational levels, and grounded in historical research of the highest caliber. That's singular! It is also an honest account that inspires, not because its characters are flawless but because of their bold persistence in seeking to heal injustices along racial and economic lines, even though doing so provoked reprisals from powerful interests. The first edition of *Mission to Black America* in 1971 helped prod and guide a church grappling with a civil rights revolution that had left it behind. Re-readers and new readers today will find in this new edition as much or more significance for current issues, along with the joy of an exciting, meaningful story. -Douglas Morgan, PhD, professor of History & Political Studies, Washington Adventist University

The Swallows of Kabul Yasmina Khadra 2007-12-18 Set in Afghanistan's capital city of Kabul, this extraordinary novel "puts a human face on the suffering inflicted by the Taliban" (San Francisco Chronicle), taking readers into the seemingly divergent lives of two couples—and depicting with

compassion and exquisite details the mentality of Islamic fundamentalists and the complexities of the Muslim world. Mohsen comes from a family of wealthy shopkeepers whom the Taliban has destroyed; Zunaira, his wife, exceedingly beautiful, was once a brilliant teacher and is now no longer allowed to leave her home without an escort or covering her face.

Intersecting their world is Atiq, a prison keeper, a man who has sincerely adopted the Taliban ideology and struggles to keep his faith, and his wife, Musarrat, who once rescued Atiq and is now dying of sickness and despair. Desperate, exhausted Mohsen wanders through Kabul when he is surrounded by a crowd about to stone an adulterous woman. Numbed by the hysterical atmosphere and drawn into their rage, he too throws stones at the face of the condemned woman buried up to her waist. With this gesture the lives of all four protagonists move toward their destinies.

Yasmina Khadra brings readers into the hot, dusty streets of Kabul and offers them an unflinching but compassionate insight into a society that violence and hypocrisy have brought to the edge of despair.
